

# Walney Extension Project

## Heysham, Lancashire

### Role

Quod is acting as planning consultant, provided strategic advice to DONG Energy on an application for up to 207 wind turbines in the Irish Sea, and associated on-shore infrastructure at Heysham, Lancashire.

The Development Consent Order application, known as the Walney Extension Project, was accepted for examination in Summer 2013 and is due to commence examination in late Autumn.

Quod played a critical auditing role of all application documentation and was responsible for preparing a number of key application documents including the Planning Statement, Design and Access Statement, Grid Connection and Cable Statement and Code of Construction Practice.

Quod is continuing to advise DONG through the examination process, assisted by our in depth knowledge gained through our work on the Hinkley Point C Project, and will be expert witness on planning issues at the examination
